

Collis Solutions for Issuers

Reliable, high quality and leading-edge Test Tools, Consultancy and Training for Issuers

World of Issuing

As an Issuer, correctly personalised, compliant and interoperable cards are your top priority. Collis Solutions for Issuers enable reliable issuance of cards. Collis has Solutions (Test Tools, Consultancy, Training) for you when you are migrating from Magstripe to EMV, working with Contactless as well as NFC.

Collis offers end-to-end Card Issuing Solutions for Issuers of all payment card types. For more than a decade, Collis has been delivering market-leading products and services to Card Issuers.

Expert Consultancy

The success of any EMV Card migration project or introduction of contactless cards often depends on the Business Analysis and Consultancy which is performed at the very beginning. Comprehensive Consultancy is available from Collis to help Issuers move in the right direction and ensure a smooth and trouble-free card roll-out.

Accredited Test Tools

Collis Test Tools enable quality assurance. Whether you are involved in only a part of the process or the complete payment ecosystem, Collis' test tools meet your needs. Issuers can use the Collis EMV Personalisation Validation Tool for ensuring the quality of their personalised contact and contactless payment cards. We also offer specialised PVT for the Production Environment (Input File, Inline and Batch Testing).

The Collis Host Test Tool is valuable in ensuring that the Authorisation Host System is capable of handling new technology that is implemented on payment cards.

In-depth Training

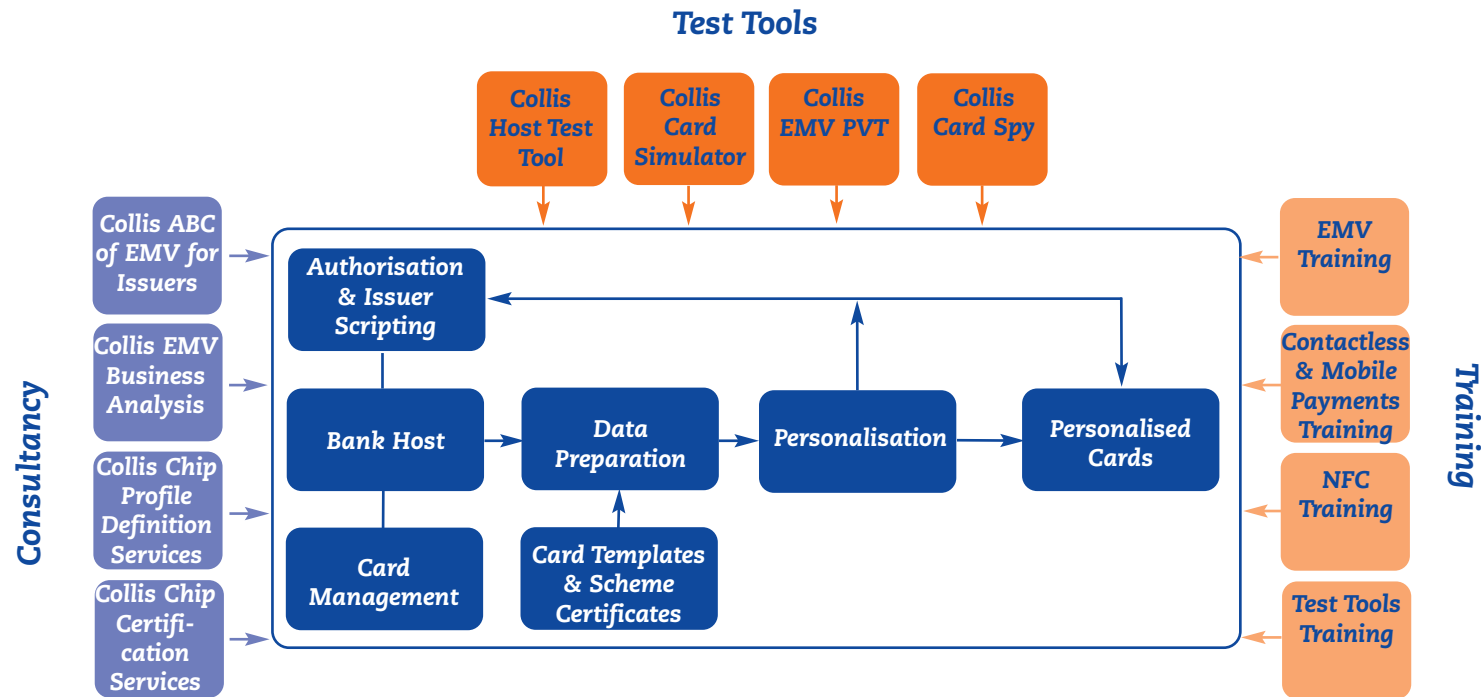

Training courses ranging from in-depth EMV Training, Contactless and Mobile Payments Training as well as courses on the optimum use of Collis Test Tools on offer, ensure that the latest and most practical knowledge is at your fingertips.
